## LAPOX<sup>®</sup> AH-711

Description

Technical Data Sheet | Polymers Business

|                        | produce protective and decorative solvent based coatings with an excellent flexibility and adhesion to most substrates.  |                   |             |                      |
|------------------------|--|-------------------|-------------|----------------------|
| Advantages             | Good inter-coat adhesion<br>High peel strength<br>Improved flexibility<br>Long working time<br>Superior corrosion resistance   |                   |             |                      |
| Applications           | General purpose epoxy adhesive<br>Maintenance coating<br>Primers and paints  |                   |             |                      |
| Processing             | High speed dispersion for paints   |                   |             |                      |
| Typical specifications | Properties   | Unit              | Test method | Values               |
|                        | Appearance   | -                 | Visual      | Yellow, brown liquid |
|                        | Colour   | GS                | ASTM D1544  | Max 9                |
|                        | Amine value  | mg KOH/g          | ASTM D2073  | 210 - 230            |
|                        | Viscosity at 40°C  | m Pas             | ASTM D2196  | 50,000 - 75,000      |
|                        | Density at 20°C  | g/cm <sup>3</sup> | -           | 0.96 - 0.98          |
|                        | AHEW   | g/eq              | -           | 190 - 238            |
|                        | Recommended ratio  | w/w               | -           | 100 - 125            |
| Packaging              | Lapox AH-711 is available in 200 kg MS   HDPE drums and 1,000 kg IBC. Other packing may be considered on request.  |                   |             |                      |
| Storage and handling   | Lapox AH-711 should be stored in a cool and dry place, preferably in a sealed container<br>and should not be exposed to direct sunlight. This product has a shelf-life of 1 year, if<br>stored in its original container between 18°C and 25°C away from humidity and excessive<br>heat. Please refer to the Safety Data Sheet (SDS) for detailed instructions on storage and<br>handling. |                   |             |                      |
| Safety                 | Wear personal protective equipment (PPE). Avoid contact with the eyes and skin. In case of direct contact and irritation, the resin should be washed off immediately with soap and warm water. Avoid breathing vapours, mist or gas Please refer to the SDS for detailed safety instructions.  |                   |             |                      |

Lapox AH-711 is a high viscosity polyaminoamide hardener based on dimer fatty acid and

aliphatic polyamine. It is designed to use with liquid or epoxy resin solutions (type-1) to

**Spills and disposal** In case of spills, sweep up and shovel the spilled material. Keep spilled material in suitable, closed containers for disposal. Soak up with an absorbent such as clay, sand or other suitable material. Flush area with water to remove trace residue. Do not allow the product to reach the sewage system. Waste must be disposed of in accordance with federal, state or local regulations, as applicable.
